SOFTWARE ENGINEER

What I'm looking for:

- To challenge myself and grow in seniority. Have more **ownership** and develop the product end-to-end. A company where ICs are more **autonomous**

Who Am I:

- Back end engineer in **Java** with 4 years of experience. Working on **distributed systems**
- Dual **French Irish citizen**. Fully French/English bilingual.
- I'm an avid Linux users, always tinkering. Participating in different meetups about coding and chess.
- Outside of work, learning **Go** and writing Neovim plugins in **Lua**. Also doing some home networking labs.

EXPERIENCE

Badakan

Feb 2024 – Today *(2 year)*

Backend engineer — *Paris, France*

- Startup environment. **SaaS platform** for HR in hotels and restaurants. Clients include large Parisian palaces
- Multitenant architecture, single monolith built with **Java 25** and **MongoDB**.
- Worked on acquiring for our biggest client. Work includes developping the following features:
  - A timesheet adjustment system
  - Integration with the customer's payroll system
  - A planning assistance module
  - Fixed price pay for temporary workers
- Improved the observability stack. Added custom spans and metrics with attributes using **Opentelemetry** libraries. Gave us better insight how our customers use the application. Allowed us pinpoint performance problems ahead of time.
- Resolved production incidents. Reduced **memory** footprint and **latency** of our most called endpoints. Reduced **90p** latency by **10x**
- Extensive MongoDB work including: optimising queries, workflows and indexing strategies.
  - Resolved a bottleneck on our **candidate search** using a **covered query** (query fully resolved with an in-memory index).
  - Optimized a client data replication workflow across environments, reducing execution time from 2-3h to 1-3 min (~**97% reduction**)

Norsys

1 year 7 months

Software engineer at **Decathlon** — June 2022 - August 2023

- Greenfield **micro service** in **Java 17, Spring Boot, Postgres and Kafka**. Service that connects second hand warehouses to the ecommerce store front
- **Event Driven** system. Service reacts to inventory changes in the warehouse and orders made on the store front. Makes API call to other services and published events in Kafka topic accordingly.

Software engineer — Jan 2022 - June 2022

- Made a major migration from **manual SQL queries** to an **ORM** *(from Spring JDBC to Spring JPA)*

EDUCATION

Trinity College Dublin

Dublin, Ireland

Bachelor of Science in Computer Science: ***II.I Honours*** — *2016 – 2020*

- **First class Honours** in 1st, 2nd and 3rd year

Projects

Undergraduate research project *C*, ***QUIC***, *Cmake* Trinity College Dublin

Last semester project to port the **QUIC** transport protocol to an embedded device. Had to read and synthesise research papers from the last 5 years on the topic. Wrote a report about my learning and attempt.

Technical Skills

Languages	:	**Java** *(Strong)*, **Bash** *(Strong)*, **Go** *(Proficient)*, **C** *(Proficient)*, **Lua** *(Proficient)*
Frameworks	:	Spring Boot
Technologies	:	**Linux/Debian**, Opentelemetry, Datadog, LaTeX, MongoDB Atlas, Kafka
Databases	:	**MongoDB**, **PostgreSQL**
Tooling	:	**Git** *(Strong)*, IntelliJ, Claude Code, Docker, Neovim
