Software Engineer

- Back end programmer in **Java** with 4 years of experience
- Passionate about **Linux/UNIX** systems and **FOSS**. I'm experienced maintaining a Linux server
- Looking for a **dynamic** company where ICs are **autonomous**
- Dual **French Irish citizen**. Fully French/English bilingual.
- Outside of work, learning **Go** and writing Neovim plugins in **Lua**. Also doing some home networking labs.

Experience

Badakan
Feb 2024 – Today *(2 year)*
Backend engineer — *Paris, France*

- Startup environment. **SaaS platform** for HR in hotels and restaurants. Clients include large Parisian palaces
- Multitenant architecture, single monolith built with **Java 25** and **MongoDB**
- I did a lot of MongoDB work. Optimising queries, indexes and workflows.
- Helped develop and design new features that unlocked our biggest client
- Resolved production incidents. Reduced **memory** footprint and **latency** of our most called endpoints
- Improved the observability stack. Added custom traces and metrics using **Opentelemetry** libraries
- Team worked with continous deployments. App deployed in **EKS** and artifacts saved in **s3**

Norsys
1 year 7 months

Software engineer at **Decathlon** — June 2022 - August 2023

- Greenfield **micro service** in **Java 17, Spring boot**. API that fulfills order for second hand products
- 3 person team, I worked on the entire app life cycle, put in place the entire stack.
- CI/CD with **Github Actions**, monitoring with **Datadog**, deployment procedures on **Kubernetes**, hosted on **GCP**
- Helped other teams in the upgrade from Spring boot 2 to 3

Software engineer — Jan 2022 - June 2022

- Worked inside the software agency, the customer Aristid, needed e-catalogues for supermarkets
- Made a major migration from **manual SQL queries** to an **ORM** *(from Spring JDBC to Spring JPA)*

Education

Trinity College Dublin
Dublin, Ireland
Bachelor of Science in Computer Science: ***II.I Honours*** — *2016 – 2020*

- **I. Honours** in 1st, 2nd and 3rd

Projects

Undergraduate research project — *C, **QUIC**, Cmake* — Trinity College Dublin

- Last semester project to port the **QUIC** transport protocol to an embedded device
- Had to read research papers from the last 5 years to learn about the topics
- Wrote a report about my learning and attempt

Technical Skills

Languages	:	**Java** *(Strong)*, **Bash** *(Strong)*, **Go** *(Proficient)*, **C** *(Proficient)*, **Lua** *(Proficient)*
Frameworks	:	Spring Boot
